

The diagram shows a 13-sided polygon with vertices labeled 1 through 13 in a clockwise direction starting from the bottom-left. Diagonals are drawn from vertex 1 to vertices 3, 4, 5, 6, 7, 8, 9, 10, and 11. These diagonals intersect to form a complex internal structure, including a central star-like shape and several smaller triangles and quadrilaterals. The overall shape is a large, irregular polygon with many internal lines.
